Our Enable Payment Method

Secure Sockets Layer (128 Bit SSL Security) uses Secure Sockets Layer (SSL) technology to provide you with the safest, most secure shopping experience possible. SSL technology enables encryption (scrambling) of sensitive information, including passwords and MasterCard numbers, during your online transactions. All of the forms on our site are secured with SSL technology so your personal information stays safe and out of malicious hands.

PCI COMPLIANT

The Payment Card Industry Data Security Standard (PCI DSS) is an information security standard for organizations that handle MasterCard and open-end credit information. Our Data protection is very high authorized. The Intercepted SSL system will hashed all the knowledge of your payment card and other data. We will never see your any information after repurchasing any products from our website or store. We only will use your delivery address to succeed in you the purchased products. T Defined by the Payment Card Industry Security Standards Council, the quality was created to extend controls around MasterCard data to scale back MasterCard fraud via its exposure.
